McDonnell-Douglas DC10 Panel
README AND INSTRUCTIONS

INSTALLATION

In order to properly install our aircraft, please follow the following steps closely.

Step #1

Extract this zip file to your main FS2004 folder. The files will automatically be put in their respective areas.

Step #2

You will need to edit the "panel.cfg" file in the "panel" folder of the aircraft of your choice. Please replace any and all lines with the following:

[fltsim]
alias=SGA\Panels\DC-10

VIEW COMMANDS

Our panel comes with standard views, including the special views listed below:

#1 key looks left rear, forward of the wing
#2 key looks right rear, forward of the wing
#3 key looks left, behind the wing

CREDITS

- **Original Panel:** Staffan Ahlberg

- **Modifications and Bitmaps:** Mike Baumann, Fraser Turner

- **Special thanks to Staffan Ahlberg for giving us permission to rework and re-release his wonderful panel!**
